faster file input, and new markup features PARSIPPANY, NJ, February 12, 2011 – OriginLab®, the leading provider of software and hardware for 3D graphing and data analysis, today released Origin® 9 and OriginPro® 9. The latest release of Origin® 9 includes a host of new features and enhancements, including support for 5.5 GHz wireless networking, faster file loading and graphics rendering, and new menu options. New additions to OriginPro® 9 include integration of the latest versions of MATLAB®, OriginTrak®, Origin® ProMesh™ and Origin® Solids™, high-performance 3D graphing capabilities and support for Voodoo® 3D graphics cards. Origin® 9 and OriginPro® 9 are available to purchase on-line through OriginLab.com, via a company distributor, or by contacting the OriginLab sales team at 800.523.0305. OriginLab also has numerous resellers, system integrators and distributors around the world. New Features Supports new wireless technology with 4×4 antenna The latest release of Origin® 9 includes support for the 4×4 802.11 wireless technology and the new 4x4 antennas.

Version 9.1.0 supports the 4x4 technology and 4x4 antennas with a single coaxial cable. With 4×4 802.11 wireless technology, users can connect wireless "hotspots" to multiple computers in the same building without the use of RF or power cabling, offering more flexibility for mobile workers. The 4×4 antennas provide a higher performance that is ideal for wireless LAN and video applications that require more signal processing, such as CAD workstations. The latest version of Origin® 9.1.0 can be purchased on-line at OriginLab.com. Origin® 9 faster file input Another major new feature in Origin® 9 is faster file loading and graphics rendering, with faster object loading from files and an option to load files into different space partitioning schemes. With Version 9.1.0, files can be loaded from a single Origin document, and into different SpacePartitionSchemes, without having to save the document to disk first. "This is a great feature, especially if you have to work with large CAD files," said author and system architect Joe Kimm, originLab, a regular contributor to the Origin blog. 3D Graphing Origin 9
